

PATRICK HART

Norman, OK | resume@hartforge.com | linkedin.com/in/patrick--hart | hartforge.com

IT infrastructure engineer supporting regulated financial environments across the U.S. Specializing in Windows Server, Active Directory, Exchange, and Group Policy administration for bank branch networks. Experienced in end-to-end client deployments, Tier IV escalation resolution, and building PowerShell automation tooling to standardize operations at scale.

WORK EXPERIENCE

Navanta (formerly BankOnIT) - Onsite Solutions Specialist

Nov 2023 - Present

- Deliver Tier IV on-site infrastructure support for community bank branches across multiple states, serving as the primary technical escalation point during deployments and break-fix engagements.
- Administer Windows Server 2016-2022 environments including Active Directory, Group Policy, DNS, DHCP, and on-premises Exchange in compliance-driven banking networks.
- Lead new client onboarding end-to-end: server builds, network cutover, workstation imaging, application configuration, and user migration with minimal branch downtime.
- Configure and maintain network infrastructure including managed switches, firewalls, VPN tunnels, and gateway appliances across distributed branch environments.
- Troubleshoot identity and access issues spanning MFA, conditional access policies, and hybrid Azure AD/on-prem configurations.
- Build reusable PowerShell tooling for diagnostics, remediation, and configuration standardization to reduce repeat escalations and accelerate onsite resolution time.
- Coordinate with banking software vendors, ISPs, and internal engineering teams to resolve complex cross-domain issues under SLA pressure.

Apple - Technical Specialist

Dec 2021 - Oct 2023

- Diagnosed and resolved hardware and software issues across the Apple ecosystem (iOS, iPadOS, macOS, watchOS), consistently ranking in top-tier support metrics for the store.
- Served as a trusted escalation resource for complex technical issues, translating root causes into clear, actionable guidance for customers and team members.
- Mentored peers on troubleshooting methodology and product knowledge, contributing to store-wide performance improvements and team development.

Apple - Product Specialist

Aug 2021 - Dec 2021

- Rapidly learned Apple product lines and consultative sales processes, earning promotion to Technical Specialist within four months based on performance and technical aptitude.
- Guided customers through product selection and setup, bridging technical details with real-world use cases to drive confident purchasing decisions.
- Provided cross-functional team support across sales floor, inventory, and visual merchandising while staying current on new product launches and features.

Air Comfort Solutions - Call Center Manager

Mar 2021 - Aug 2021

- Managed a team of call center agents, developing performance standards and operational procedures that improved response consistency and service quality.
- Administered Office 365 applications and analyzed call volume data to identify trends, reduce handling times, and inform process improvements.

CERTIFICATIONS, SKILLS & TECHNOLOGIES

Certifications: Apple Certified Support Professional (iOS, iPadOS, watchOS, tvOS) | Apple Certified Hardware Technician (iPhone, iPad, Mac, MacBook)

Infrastructure: Windows Server 2016-2022, Active Directory, Group Policy, DNS, DHCP, Exchange Server (on-prem), Azure AD, Intune

Networking & Security: Switch, firewall, and gateway configuration; VPN and secure remote access; VLANs; MFA; conditional access; identity troubleshooting

Automation & Ops: PowerShell scripting, workstation imaging, provisioning and rollout workflows, configuration standardization, runbook development, incident response, root cause analysis

Platforms & Tools: Windows 10/11, Office 365, Apple OS (iOS/iPadOS/macOS/watchOS/tvOS), VOIP platforms, core banking and teller applications
